

WOOD SAVER'S™

If you have a Bradley Smoker®, one of the most important accessories for you is our “**WOOD SAVER'S™**”. Ultra Industries has looked at what we could do to improve your smoking experience. We have made our new product to help you save wood, and ease cleanup. If you have a Bradley Smoker® you know you can never use those last two Bisquettes®, and one of them always gets burnt a little. Ultra Industries solution is easy, just put some of our **WOOD SAVER'S™** in your smoker when you are ready to finish up smoking. The smoker uses the **WOOD SAVER'S™** instead of the last three Bisquettes®. It will save you time in cleanup, and Money in wasted wood. And give you a better tasting smoke because it puts that last Bisquettes® into the water pan were it belongs.

SO DON'T FORGET to buy your **WOOD SAVER'S™** from www.ultra-ind.com.

Instructions: **

- 1.) Load the wood you need for the time you are going to smoke, go to step 2.) (~1 every 20 min., or ~3 Bisquettes® per Hour).
Example: 4 hours x 3 = ~12 Bisquettes®
If you don't know how long your going to smoke load your wood, & smoke.
After you have loaded the last of your wood go to step 2.)
 - 2.) After you have loaded your wood place your **WOOD SAVER'S™** on top of your wood just like you added three more Bisquettes®.
 - 3.) Finish up your smoking.
 - 4.) Turn smoker off.
 - 5.) Unplug smoker from electrical source.
 - 6.) Allow smoker to cool before starting clean up.
 - 7.) **Recommended procedure for removing WOOD SAVER'S™ from smoker.**
Remove Cooking Racks, & Drip Tray. Remove Drip/Water/Waste Pot (the bowl that burnt wood falls in to). Clean bowl. Put cold water in bowl, & place bowl back in smoker. (Make sure you have completed step 5.) Take a utensil (example tongs) and slide **WOOD SAVER'S™** into bowl of cold water. Allow plenty of time to cool before handling.
- WARNING :**
DO NOT HANDLE **WOOD SAVER'S™** OR ANTHING HOT WITH YOUR BARE HANDS. **Handling WOOD SAVER'S™ before they have cooled will result in a BURN.**
Depending on the temperature burns can be severe. Placing **WOOD SAVER'S™** on a combustibile material could result in burning, melting, scorching, or scarring of that surface. The **WOOD SAVER'S™** are made of thick aluminum, & will remain HOT longer then the other parts of your smoker. Just like putting a skillet or heavy pot in an oven, the **WOOD SAVER'S™** will take quite some time to cool down. **WOOD SAVER'S™** will be hotter then the interior of the smoker because they are on or near the Bisquette Burner (heat sores that burns the wood).
- 8.) Clean **WOOD SAVER'S™** just like you do the rest of your smoker parts.
WOOD SAVER'S™ can be placed in the silverware compartment of your dishwasher. Make sure that **WOOD SAVER'S™** are clean and dry before you put them away. Following all of these steps should allow you to get many years of joy from your **WOOD SAVER'S™**.

** Read your Bradley Smoker® Owners Manual and familiarize yourself with its operation before using **WOOD SAVER'S™**. Always follow safe operating procedures.
